

# Losterin

“Losterin” naphtalan shampoo, 150 ml

**Promotes reduction of skin itching, irritation,  
dryness and exfoliation**

**Ingredients:** MIPA-Laureth Sulfate (and) Laureth-3 (and) Laureth-7 Citrate, Arcticum Lappa Seed Oil, Prunus Amygdalus Dulcis (Sweet Almond) Oil, Ethylhexyl Oliviate, Linseed Oil, Naphtalane, SC-CO2 Sophora japonica L. Extract, Propylene Glycol, BHT, Ascorbyl Palmitate, Glyceryl Stearate, Citric Acid.

The most common scalp skin diseases are: seborrhea (dandruff), seborrhea dermatitis, psoriasis, furunculosis, different types of mycosis (mycotic lesion). These diseases are characterized by chronic exacerbations, stubbornly resistant to treatment, and as a rule, are accompanied by painful itching, inflammation, and excessive exfoliation and scalp skin dryness. These diseases are also accompanied by skin damage, which may lead to consecutive infection.

**Purpose of use:** “Losterin” shampoo is intended for dry, sensitive, irritated scalp skin and hair daily care.

**Recommended for:**

- complex treatment of chronic skin diseases:
  - **Seborrhea (dandruff)**
  - **Seborrhea dermatitis**
  - **Psoriasis**
  - **Furunculosis**
  - **Different types of mycosis (dermatomycosis);**
- chronic scalp skin disease exacerbation, remission prolongation;
- damaged skin barrier, dry and irritated scalp skin;
- skin and hair functions restoration after earlier skin diseases and after a cancelation of aggressive external medications.

“Losterin” shampoo contains a balanced combination of active naphtalan, natural oils and medical plants extracts. During shampoo application on skin, there takes place an interaction of outer skin lipid layer and “Losterin” lipids. Shampoo bioactive components penetrate into epidermis inner layers, providing complex therapeutic effect on scalp skin and hair.

**Resin free naphtalan** – is a purified from resinous substances natural naphtalan, with a significant anti-inflammatory, vasodilating, desensitise and antibacterial action, improves microcirculation, increases metabolic process intensity and stimulates skin trophic functions.

**Japanese pagoda tree extract** contains a complex of alkaloids and flavonoids, including rutin, which possesses anti-inflammatory action, able to thicken vascular walls and decreases its fragility. Japanese pagoda tree alkaloids are able to suppress proliferation of keratinocytes, reducing skin exfoliation. Japanese pagoda medications are used for purulent inflammation processes (wounds, burns, trophic plaques), seborrhea, psoriasis, inflammation and dermatomycosis of skin, eczema, lupus, furunculus and trophic plaques.

**Burdock root** has a dermatotropic effect, improving skin conditions and trophic. Polyunsaturated compounds of the root possess antibacterial and anti-fungal properties. Burdock is an effective plant, widely used for a complex treatment of such skin diseases as eczema, psoriasis, acne, seborrhea, dandruff, skin itch and furunculus. Burdock root infusion based on almond or olive oil (burdock oil) is used for hair strengthening and hair loss.

**Natural oils (almond, linseed, sunflower)** contain vitamins E and F, a fatty acids mixture (oleic, linoleic and linolenic acids), which promote the regeneration (renewal) of skin cells, collagen synthesis, tissue regeneration. Oils regulate lipid and water skin balance, protect from external negative factors, possess anti-inflammatory, vulnerary, cleansing, softening and nourishing properties.

**Thus, “Losterin” cream ingredients possess significant anti-inflammatory, antipruritic, exfoliating and anti-microbial action, promotes affected skin regeneration, increases skin barrier, prevent the feeling of dryness and irritation.**

“Losterin” shampoo does not contain hormones, preservative, coloring agents and fragrances.

Does not contain soap, does not harm skin physiological pH. Shampoo natural formula allows to use it as often as required.

**Application method:** massage shampoo into damp hair, and wash thoroughly. Apply again, leave for 2 minutes and wash with warm water. Regardless of rapid effect (skin moisturizing, dandruff elimination, reduction of dryness, itchiness and irritation), the main repairing action takes place no sooner than 7 – 10 days of usage and reinforces only after a course of application.

Due to soft cleansing ingredient, Losterin shampoo is easily washed off from scalp and skin surface, which allows for lipid components to be partially absorbed and partially washed off together with impurities, taking gentle care of protective lipid film.

To be used externally only!

**Shelf life:** 24 months.

**Safety precautions:** in case of contact with eyes wash thoroughly with water. Not to be used if case of components intolerance.

**Storage conditions:** store at temp +5 °C to +25 °C, avoid direct sunlight during storage.

Date of manufacture (month, year), lot number are indicated on the package.
