

Losterin

“Losterin” naphtalan cream-soap, 150 ml

**Reduces itching, skin irritation, dryness exfoliation,
possesses anti-microbial action**

Ingredients: Aqua, Water (and) Sodium Trideceth Sulfate (and) Sodium Lauroamphoacetate (and) Cocamide MEA (and) Sodium Chloride (and) Methylisothiazolinone, Helianthus Annuus (Sunflower) Seed Oil, Sodium Chloride, Naphtalane, Citric Acid, Hydroxypropyl Guar Hydroxypropyltrimonium Chloride, Propylene Glycol, BHT, Ascorbyl Palmitate, Glyceryl Stearate, Citric Acid, Methylchlorisothiazolinone (and) Methylisothiazolinone, Disodium EDTA.

Our hands face aggressive influence of external factors daily, therefore a gentle care and hand skin restoration are the main factors in different skin diseases prevention. It is especially important for people who deal with eczema, psoriasis, atopic dermatitis and other inflammatory dermatosis. Except for severe skin dryness, these diseases are characterized by inflammation, different degree of itching and exfoliation. Constant and proper hand skin care allows to prevent disease exacerbation and avoid different complications, such as consecutive infection.

Purpose of use: “Losterin” cream-soap is specifically designed for dry, sensitive hand skin daily care:

- complex therapy for different forms of diseases with severe hand skin dryness:
 - Eczema
 - Psoriasis
 - Xerosis
 - Atopic dermatitis
 - Contact dermatitis
 - Ichtyosis
 - Keratoderma (different forms)
 - Pityriasis rubra pilaris
- for prevention of hand skin chronic disease exacerbation, remission prolongation;
- for damaged skin barrier, dry and irritated hand skin.

“Losterin” cream – soap contains a balanced combination of active naphtalan and natural oil. During cream-soap application on skin, there takes place an interaction of outer skin lipid layer and “Losterin” lipids. Cream-soap bioactive components penetrate into epidermis inner layers, providing complex therapeutic effect: gently cleanse and moisturize hand skin, reduce inflammation, itching and irritation, offer anti-microbial and regenerative effect.

Main active ingredients:

Resin free naphtalan is a purified from resinous substances natural naphtalan, with a significant anti-inflammatory, desensitizing, vasodilating and antibacterial effect, improves microcirculation, increases metabolic process intensity and stimulates skin trophic functions.

Natural oil contains vitamins E and F, the complex of fatty acids (oleinic, linoleic and linolenic) which promote skin cells regeneration (renewal), collagen synthesis, tissue restoration. The oils regulate skin lipid and water balance, protect it from stressful external conditions, possess anti-inflammatory, wound healing, purifying, softening and nourishing actions.

Does not contain hormones, coloring agents and fragrances.

Natural cream-soap formula allows to use it as often as required.

Application method: apply a small amount of cream – soap on damp palm and wrist skin, lather and rinse with water.

Due to a soft cleansing component, “Losterin” cream – soap is easily washed off from skin surface with warm water, allowing for lipid components to be partially absorbed and partially washed off together with impurities, taking gentle care of protective lipid film.

To be used externally only!

Shelf life: 24 months. Date of manufacture (month, year), lot number are indicated on the package.

Safety precautions: in case of contact with eyes, wash thoroughly with water. Not to be used if case of components intolerance.

Storage conditions: store at temp +5 °C to +25 °C, avoid direct sunlight during storage.
