

# Losterin

“Losterin” shower gel, 150 ml

**Promotes reduction of skin itching,  
irritation, dryness and exfoliation**

**Ingredients:** MIPA-Laureth Sulfate (and) Laureth-3 (and) Laureth-7, Sunflower Seed Oil, Ethylhexyl Olivat, Olea Europaea (Olive) Fruit Oil, Caprylic/capric Triglyceride, Linseed Oil, Simmondsia Chinensis (Jojoba) Oil, Naphtalane, SC-CO2 Sophora japonica L. Extract, Propylene Glycol, BHT, Ascorbyl Palmitate, Glyceryl Stearate, Citric Acid.

The most common skin diseases are: psoriasis, eczema, atopic dermatitis, seborrhea, seborrheic dermatitis, ichthyosis, xerosis. These dermatoses differ by chronic relapsing disease course, frequent exacerbations, which are difficult to treat and are usually accompanied by inflammation, painful itching, excessive sloughing and dryness of skin. In addition, these diseases frequently cause damage of skin barrier function, which can lead to the development of secondary infection..

**Purpose of use:** “Losterin” shower gel is specifically designed for daily care for dry, sensitive, irritated skin.

**Recommended for:**

- a complex therapy for different forms of dermatitis/dermatosis with severe dry skin:
  - **Psoriasis**
  - **Eczema**
  - **Atopic dermatitis**
  - **Seborrhea dermatitis**
  - **Contact dermatitis**
  - **Lichen planus**
  - **Ichthyosis**
  - **Xerosis**
- prevention of exacerbations of chronic dermatosis, prolongation of remission;
- skin damage, skin dryness and irritation.

Naphtalan "Losterin" shower gel contains a balanced combination of active naphtalan, natural oils and Japanese pagoda tree extract. When applying the gel to the surface of skin, there happens a rapid interaction of interfacial lipid barrier of the skin and naphtalan “Losterin” lipids. Bioactive components of the gel penetrate into inner layers of epidermis, providing a complex therapeutic effect on skin.

**Resin-free naphtalan** is a purified from resinous substances natural naphtalan, with a significant anti-inflammatory, anesthetic, vasodilating, desensitise and antibacterial action, improves microcirculation, increases metabolic process intensity and stimulates skin trophic functions

**Japanese pagoda tree extract** contains a complex of alkaloids and flavonoids, including rutin, which has a strong anti-inflammatory effect, the ability to strengthen the vessels walls and reduce their fragility. Sophora alkaloids are able to suppress proliferation of keratinocytes, reducing skin sloughing. Sophora based medications are used for severe purulent inflammatory processes (wounds, burns, trophic ulcers), as well as in seborrhea, psoriasis, inflammatory and fungal skin diseases, eczema, burns, lupus, furuncles and trophic skin ulcers.

**Natural oils (linseed, olive and sunflower)** contain vitamins E and F, a fatty acids mixture (oleic, linoleic and linolenic acids), which promote the regeneration (renewal) of skin cells, collagen synthesis, tissue regeneration. Oils regulate lipid and water skin balance, protect from external negative factors, possess anti-inflammatory, vulnerary, cleansing, softening and nourishing properties.

**Thus, the ingredients of naphtalan “Losterin” shower gel possess an anti-inflammatory, antipruritic, exfoliating and anti-microbial effect, help to improve the restoration of damaged skin, increase regenerative and barrier skin functions, prevent dryness and irritation.**

Does not contain soap. Does no harm to the physiological pH of skin. Does not contain hormones, preservatives, coloring agents and fragrances

Shower gel natural formula allows you to use it as often as required.

**Application method:** apply gently a small amount of gel on moist skin, then wash thoroughly with water.

Despite the rapid effect (skin moisturization, dryness, itching, irritation reduction), the main reparative action takes effect not sooner than 7-10 days of use and strengthens only when used as a course treatment.

Due to Naphtalan "Losterin" shower gel's soft cleansing component, it is easily removed from the skin surface with warm water, while the lipid components are partially absorbed and partially removed together with pollutions, carefully preserving the protective lipid skin mantle.

For external use only.

**Shelf life:** 24 months.

**Safety precautions:** in case of contact with eyes, wash thoroughly with water. Not to be used if case of components intolerance.

**Storage conditions:** at temperatures between +5 °C and +25 °C in a place protected from direct sunlight.

Date of manufacture (month, year), lot number are indicated on the package.
